Redefining the Renaissance Woman

This year's 2024 San Gabriel Valley Women's Summit invites you to meet the modern day Renaissance Woman.

The term "renaissance" often conjures of images of 15th and 16th century paintings and refers, generally, to the successes of men in the transition from the Middle Ages to modernity. But at its core, the definition of renaissance is "rebirth" and is used to describe those that embody the ideals of pursuing knowledge, seeking social consciousness, and finding balance within their endeavors.

Whether she is a young professional, a seasoned executive, a mother, a caretaker, an entrepreneur, or anything in between, the Renaissance Woman is able to adapt and thrive. A Renaissance can be both a nurturing mother and a tenacious entrepreneur. She can excel in her corporate job during the week, while spending her weekends selflessly volunteering. She weaves together her multitudes to create a brilliant tapestry of her strength, resiliency, and hopefully at the end of 2024 Summit, expanded supportive connections of fellow Renaissance Women.

This year's sessions will offer opportunities to:

Tell your personal story both in written and spoken word

Expand your knowledge on embracing modern technology, such as Chat GPT and Canva

Provide tools in gracefully navigating major life transitions

Embracing health and wellness practices to care for your best self

Join the Duarte Chamber of Commerce on Friday, May 10 to engage in meaningful learning, cultivate connections, and prioritize yourself as we redefine together the modern Renaissance Woman.
